

ISOLIMPIA® B

ISOLIMPIA® B is a thermal - insulating and sound absorbing material made with 100% thermobonded black polyester. (Polyethylene terephthalate - Co-Polymer Polyethylene terephthalate).

ISOLIMPIA® B has been designed specifically for particular applications where the completely black color is required.

The characteristic of thermobonding is the complete recyclability of the product and of its clippings: **ISOLIMPIA® B** is 100% recyclable. On this feature we focus more and more also because the increasing interest in ecological purposes reduces the cost of disposing clippings.

No less important is the fact that **ISOLIMPIA® B** does not disperse fibers, powders, particles or fibrils potentially harmful for humans into environment.
