

ISOLIMPIA® R

ISOLIMPIA® R is a thermal - insulating and sound absorbing material made with 100% thermobonded polyester. (Polyethylene terephthalate - Co-Polymer Polyethylene terephthalate).

ISOLIMPIA® R has been specifically designed for the 'insulation of railway rolling stock.

The characteristic of thermobonding is the complete recyclability of the product and of its clippings: **ISOLIMPIA® R** is 100% recyclable. On this feature we focus more and more also because the increasing interest in ecological purposes reduces the cost of disposing clippings.

Not less important is the fact that **ISOLIMPIA® R** does not disperse fibers, powders, particles or fibrils potentially harmful for humans into environment.
