

ISOLIMPIA® G

ISOLIMPIA® G is a thermal - insulating and sound absorbing material made with 100% thermobonded grey color polyester (Polyethylene terephthalate - Co-Polymer Polyethylene terephthalate).

ISOLIMPIA® G has been designed specifically for those applications where a grey colored product is required.

The characteristic of thermobonding is the complete recyclability of the product and of its clippings: **ISOLIMPIA® G** is 100% recyclable. On this feature we focus more and more also because the increasing interest in ecological purposes reduces the cost of disposing clippings.

Not less important is the fact that **ISOLIMPIA® G** does not disperse fibers, powders, particles or fibrils potentially harmful for humans into environment.
