

ISOLIMPIA® R-O

ISOLIMPIA®R-O is a thermally insulating material and a sound absorber made of 100% polyester fiber thermobonded (Polyethylene terephthalate - Co-Polymer Polyethylene terephthalate) specifically designed for use in the railway sector.

ISOLIMPIA®R-O has been designed specifically for the insulation of railway rolling stocks where to the fibers is required a special repellent action against water and oils.

The characteristic of thermobonding is the complete recyclability of the product and of its clippings: **ISOLIMPIA®R-O** is 100% recyclable. On this feature we focus more and more also because the increasing interest in ecological purposes reduces the cost of disposing clippings.

Not less important is the fact that **ISOLIMPIA® R-O** does not disperse fibers, powders, particles or fibrils potentially harmful for humans into environment.
