

## **ISOLIMPIA® M HT1**

**ISOLIMPIA® M HT1** is a thermal - insulating and sound absorbing material made with 100% thermobonded polyester. (Polyethylene terephthalate - Co-Polymer Polyethylene terephthalate high melting point bicomponent fiber).

**ISOLIMPIA® M HT1** has been designed specifically for particular applications where the product is required to maintain dimensions, in particular the thickness, up to a temperature of 140°C.

The characteristic of thermobonding is the complete recyclability of the product and of its clippings: **ISOLIMPIA® M HT1** is 100% recyclable. On this feature we focus more and more also because the increasing interest in ecological purposes reduces the cost of disposing clippings.

Not less important is the fact that **ISOLIMPIA® M HT1** does not disperse fibers, powders, particles or fibrils potentially harmful for humans into environment.
