

**ISOLIMPIA®**

**ISOLIMPIA®** is a thermal insulating and acoustical absorbing material 100% thermo bonded polyester fibers made (Polietylteterephtalate – Polietylteterephtalate co-polymer).

**ISOLIMPIA®** has been designed for building applications, common railway applications and general purposes and is **EPD®** (Environmental Product Declaration) certified.

The characteristic of thermobonding is the complete recyclability of the product and of its clippings: **ISOLIMPIA®** is 100% recyclable. On this feature we focus more and more also because the increasing interest in ecological purposes reduces the cost of disposing clippings.

Not less important is the fact that **ISOLIMPIA®** does not disperse fibers, powders, particles or fibrils potentially harmful for humans into environment.
