

ISOLIMPIA®O

ISOLIMPIA®O is a thermal - insulating and sound absorbing material made with 100% thermobonded polyester. (Polyethylene terephthalate - Co-Polymer Polyethylene terephthalate).

ISOLIMPIA®O has been designed specifically for particular applications where to the fibers is required a unique repellent action against water and oils.

The characteristic of thermobonding is the complete recyclability of the product and of its clippings: **ISOLIMPIA®O** is 100% recyclable. On this feature we focus more and more also because the increasing interest in ecological purposes reduces the cost of disposing clippings.

Not less important is the fact that **ISOLIMPIA®O** does not disperse fibers, powders, particles or fibrils potentially harmful for humans into environment.
